Platform Requirements

The LATS source code is available, and has been built on the following platforms:

Distribution Name	Machine	uname −a	Version
aix	IBM RS4000	AIX 2 3 000039577000	LATS 1.0
alpha	DEC Alpha	OSF1 V3.2 41.64 alpha	LATS 1.5
c90	CRAY C90	sn4005 8.0.4 u31.20 CRAY C90	LATS 1.3
hpux	HP	HP−UX A.09.01 A 9000/755	LATS 1.3
irix4	SGI	IRIX 4.0.5 06151813 IP12	LATS 1.0
irix5	SGI	IRIX 5.3 11091812 IP22 mips	LATS 1.3
irix6	SGI	IRIX 6.2	LATS 1.5
j90	CRAY J90	sn9550 9.0.2.2 car.6 CRAY J90	LATS 1.5
linux	x86 PC	Linux 2.0.21 #5	LATS 1.0
sol2	SUN	SunOS 5.5.1 Generic_103640−03 sun4d	LATS 1.5
sunos4	SUN	SunOS 4.1.3 1 sun4m	LATS 1.5

If your system does not exactly match, try a version which is close. The libraries will generally work within operating system major versions (e.g., 2 in version 2.5.1 of Solaris (now called 5.5.1) or with an OS at a higher version (e.g., V3.0 LATS will often work in OS V4.0). LATS built on system with a higher version than that of the target system may work, so try the library for your platform.

If you are unable to find a compatible version, then please contact lats support (lats@pcmdi.llnl.gov).
